

**SKI PROACTIVE CONTROL KIT
(FOR PLASTIC SKIS ONLY)
(P/N 860 703 700)**

◆ WARNING

For safety reasons, this kit must be installed by an authorized Bombardier snowmobile dealer. Should removal of a locking device be required when undergoing disassembly/assembly, always replace with a new one. This instruction sheet should be given to the purchaser. This kit is designed for specific applicable models only. It is not recommended for units other than those for which it was sold.

NOTE: Installation time is approximately 0.5 hour.

PARTS TO BE INSTALLED

- 1. Proactive Control (2)
- 2. Screw M5 x 25 (4)
- 3. Flanged Elastic Nut M5 (4)
- 4. Flat Washer M6 (4)
- 5. Screw no. 10 x 5/8 (12)

SKI REMOVAL

Lift front of vehicle.

Remove skis from vehicle.

PROACTIVE CONTROLS INSTALLATION

Turn ski over and place in a bench vise.

Position proactive control **no. 1** onto ski.

NOTE: Align proactive control slot with ski runner slot, as shown in the following photo.

1. Ski surface
2. Proactive control

Using a center punch, mark the position of the two holes nearest of fork's base, as shown.

Temporarily remove proactive control and drill two 4 mm (5/32 in) holes to an approximate depth of 16 mm (5/8 in), as shown.

▼ CAUTION

Holes must be drilled toward the center line of the ski in an angle of 15°.

Reinstall proactive control.

Secure with screws **no. 5**.

Continue proactive control installation using the following sequence.

TYPICAL — INSTALLATION SEQUENCE

NOTE: When performing steps 2 and 3 on the installation sequence, use vise-grip to hold proactive control in place. Refer to the following photo.

A00G0CA

FINALIZING PROACTIVE CONTROL INSTALLATION (STEPS 4 AND 5)

Finalize proactive control installation by drilling a 5,2 mm (13/64 in) hole. Drill through plastic perpendicularly to ski surface.

Secure with screws **no. 2**, washers **no. 4** and flanged elastic nuts **no. 3**, as shown on the next photo.

A00G0DA

TYPICAL

1. Washer on this side and flanged elastic nut on the other side

Repeat procedure for the other ski.

SKI INSTALLATION

Reinstall both skis on vehicle.

Torque to 40 N•m (30 lbf•pi).
